

D30

TOUCHSCREEN ELECTRONIC FLIGHT DISPLAY

Meet the latest addition to the Dynon Certified product line: The Dynon D30 Touchscreen Electronic Flight Display. The D30 serves as a backup set of flight instruments in STC'd SkyView HDX systems*, which can now be installed into over 600 type certificated aircraft models.

The D30 features a large 4", sunlight readable, high resolution touchscreen display. An integrated backup battery provides up to 5 hours of runtime in the event of aircraft power failure, giving pilots confidence that they have access to critical flight information when it is needed most.

Compact at only 3.7" deep, the D30 mounts in a slightly modified 3-1/8" instrument hole via a docking ring mounting bracket. The bracket allows for one-screw installation and removal of the instrument.

DYNON
CERTIFIED

*D30 not FAA approved for standalone use. It must be installed with SkyView HDX in type certificated aircraft.

D30 FEATURES

Featuring the largest, highest resolution sunlight readable display in its class, the D30 provides a crisp and clear view of critical backup flight information. The D30 is a robust set of backup instruments, including attitude, airspeed, altitude, vertical speed, turn rate, and slip/skid indications.
